

# 2019 Generic Centric Formulary

Effective January 1, 2019

**For the most current list of covered medications or if you have questions:**

Call the member phone number on your ID card.

Visit your plan's member website listed on your ID card to:

- Locate a participating retail pharmacy by ZIP code.
- Look up possible lower-cost medication alternatives.
- Compare medication pricing and options.

### **What is a formulary?**

A formulary is a list of prescribed medications chosen by your plan for their safety, cost and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications approved by the U.S. Food and Drug Administration (FDA).

A group of doctors, nurses and pharmacists meet regularly to assess the formulary. They review which medications will be covered, how well the drugs work and overall value. They also make sure there are safe, covered options available.

### **How do I use my formulary?**

You and your doctor can consult the formulary to help you select the most cost-effective prescription medications. This guide tells you if a medication is generic or brand, and if special rules apply. Bring this list with you when you see your doctor. If your medication is not listed here, please visit your plan's member website or call the member phone number on your ID card.

Some medications on your formulary have extra requirements before they can be covered. A few of the most common coverage programs are prior authorization (PA), step therapy (ST) and quantity limits (QL). We use programs like these to help make sure the medication you take is safe and effective. Check your plan documents for more information. Some Affordable Care Act (ACA) preventive medication may have coverage restrictions. If you want to learn more about these programs or to see if you take a medication in one of these programs, please visit your plan's member website or call the member phone number on the back of your ID card.

### **What are tiers?**

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, determined by your employer or plan sponsor. This is how much you will pay when you fill a prescription.

---

### **About this formulary**

Where differences exist between this formulary and your benefit plan documents, the benefit plan documents rule. This may not be a complete list of medications, and not all medications listed may be covered by your plan. Please look at the benefit plan documents provided by your employer or plan sponsor for full details.

---

## Understanding your formulary

### **When does the formulary change?**

- Medications may move to a lower tier at any time.
- Medications may move to a higher tier when a generic equivalent becomes available.
- Medications may move to a higher tier or be excluded from coverage on January 1 or July 1 of each year.

When a medication changes tiers, you may have to pay a different amount for that medication.

### **Why are some medications excluded from coverage?**

A medication may be excluded from coverage under your pharmacy benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

### **What if I don't agree with a decision about an excluded medication?**

You (or your authorized representative) and your doctor can ask for a coverage request by calling the member phone number on your ID card.

### **What is the difference between brand-name and generic medications?**

Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less. Once the patent for a brand-name medication ends, the FDA can approve a generic version with the same active ingredients.

### **What if my doctor writes a brand-name prescription?**

If your doctor gives you a prescription for a brand-name medication, ask if a generic equivalent or lower-cost option is available and could be right for you. Generic medications are usually your lowest-cost option.

### **What if I am taking a specialty medication?**

Specialty medications treat rare or complex conditions and are typically higher cost medications. Please note, not all specialty medications are listed in the formulary. BriovaRx®, the OptumRx® specialty pharmacy, can provide most of your specialty medications along with helpful programs and services. Call BriovaRx at **1-855-4BRIOVA (1-855-427-4682)** and have your prescriptions delivered right to your home or doctor's office.

Non-preferred brand medications are excluded from coverage, but most specialty medications are covered. You can visit your plan's member website, or call the member phone number on the back of your ID card for more information about your benefit plan.

---

### **Over-the-counter medications**

An OTC medication may be the right treatment option for some conditions. Talk to your doctor about available OTC options. Even though these medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

---

## Reading your formulary

The formulary gives you choices so you and your doctor can determine your best course of treatment. In this formulary, brand-name medications are shown in UPPERCASE (for example, CLOBEX) and generic medications in lowercase (for example, clobetasol).

### Tier information

Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost. Your plan may have multiple or no tiers. Please note: If you have a high deductible plan, the tier cost levels will apply once you hit your deductible.

Drug Tier	Includes	Helpful Tips
<b>Tier LC</b>	\$ <b>Lower Cost Generic</b>	Use Tier LC drugs for lowest out-of-pocket costs.
<b>Tier GD</b>	\$ <b>Generic</b>	Use Tier GD generic drugs, instead of brand-name drugs, to help reduce your out-of-pocket costs.
<b>Tier BD</b>	\$\$ <b>Brand</b>	Use Tier BD where generic options are limited.
<b>Tier GS</b>	\$\$\$ <b>Generic Specialty</b>	Tier GS is generally higher in co-payment and cost. These drugs are sometimes used to treat complex and chronic conditions and may require special monitoring or handling.
<b>Tier PS</b>	\$\$\$\$ <b>Preferred Specialty</b>	Tier PS is generally second highest in co-payment and cost. These drugs are sometimes used to treat complex and chronic conditions and may require special monitoring or handling.
<b>Tier NS</b>	\$\$\$\$\$ <b>Non-Preferred Specialty</b>	Tier NS is generally highest in co-payment and cost. These drugs are sometimes used to treat complex and chronic conditions and may require special monitoring or handling.

### Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan determines how these medications may be covered for you.

<b>M</b>	Authorized generic or co-branded product
<b>PA</b>	<b>Prior Authorization</b> – Your doctor is required to provide additional information to determine coverage.
<b>QL</b>	<b>Quantity Limit</b> – Medication may be limited to a certain quantity.
<b>SP</b>	<b>Specialty Medication</b> – Medication is designated as specialty.
<b>ST</b>	<b>Step Therapy</b> – Trial of lower-cost medication(s) is required before a higher-cost medication can be covered.
