

MHC Medical Products – Recall of Easy Touch[®] Insulin Syringe

- On April 27, 2018, [MHC Medical Products](#) expanded the voluntary recall of [Easy Touch insulin syringe](#) to include one lot of the 29G 0.5 mL ½ inch product due to mislabeling. A recall of the Easy Touch Insulin Syringe 29G 1 mL ½ inch product was originally announced on [April 11, 2018](#).
- After further investigation, MHC Medical Products is expanding the recall to include the following product:

Product Description	NDC #	Lot #	Item #
Easy Touch insulin syringe 29G 0.5 mL ½ inch	08496-2955-01	45016	829555

- While the case carton and poly bag (immediate package) of the Easy Touch Insulin Syringe 29G, 1 mL ½ inch are correctly labeled, some retail shelf cartons are incorrectly labeled as lot #45016, which is associated with the Easy Touch 29G, 0.5 mL ½ inch insulin syringe. This incorrect labeling could result in incorrect product use and could delay patient treatment.
- Anyone with existing inventory of the recalled product should immediately quarantine and discontinue distribution of the product. MHC Medical will issue a credit for the returned product upon its receipt.
- Patients should contact their healthcare provider if they have experienced any problems that may be related to using the recalled product.
- Patients should return the recalled product to the pharmacy or may contact the MHC customer service line at **1-877-358-4342** for return/replacement.
