

Drug Shortage – Lacrisert[®] (hydroxypropyl cellulose ophthalmic insert)

- The [drug shortage](#) of Bausch's [Lacrisert \(hydroxypropyl cellulose ophthalmic insert\)](#) is ongoing. Lacrisert has been unavailable for at least 90 days.
 - Bausch estimates supply will resume in July 2023.
- Lacrisert is indicated in patients with moderate to severe dry eye syndromes, including keratoconjunctivitis sicca. Lacrisert is indicated especially in patients who remain symptomatic after an adequate trial of therapy with artificial tear solutions. Lacrisert is also indicated for patients with exposure keratitis, decreased corneal sensitivity, and recurrent corneal erosions.
