

AzaSite® (azithromycin), Belladonna and Opium Suppository – Drug shortages

- The drug shortages of Akorn's [AzaSite \(azithromycin\)](#) 1% ophthalmic solution and Perrigo's [belladonna and opium](#) suppositories are ongoing.
 - [AzaSite](#) has been unavailable for at least 90 days due to shipping delays. The estimated availability date for AzaSite is unknown at this time.
 - [Belladonna and opium](#) suppositories have been unavailable for at least 90 days due to manufacturing delays due to a shortage of an active ingredient. This product is estimated to be available in the first week of October 2018.
- AzaSite is indicated for the treatment of bacterial conjunctivitis caused by susceptible isolates of certain microorganisms.
- Belladonna and opium suppositories are used for relief of moderate to severe pain associated with ureteral spasm not responsive to non-narcotic analgesics and to space intervals between injections of opiates.
