

Step therapy — Premium

Most medical conditions have many medication options. Although their clinical effectiveness may be the same, the cost can be very different. The Step Therapy program gives you the treatment you need, usually at a lower cost.

Here's how it works:

With this program, you must try a Step 1 medication first, before a Step 2 medication may be covered. When you bring a prescription to your pharmacy, our system will check the medication for step therapy requirements. If your old pharmacy claims show you have tried a Step 1 medication in the recent past, the Step 2 medication may be filled. If not, the pharmacist will contact your doctor to explain next steps.

We encourage you to talk about your treatment and medication options with your doctor. If you have questions about the Step Therapy program, call the phone number on your member ID card.
